Overview

Results-driven Electronics Engineer, UI / UX Designer and Content Writer with strong foundation in basics electronics , responsive web design, and digital asset creation. Skilled in C++, Canva, Figma and user interface design. Experience collaborating in agile teams to deliver engaging user experiences. Passionate about building accessible and mobile-friendly websites, optimizing UI components, and designing branded visual content for web and social media. Actively seeking internships in Arduino or creative design where I can apply coding, UX design, and content writing knowledge.

Work Experience

- **Graphic Designer Intern , Webnixian –**

Jan 2026 - March 2026

Webnixian is a founder-led AI & development studio building custom AI Agent Systems for SaaS and D2C businesses across India and the Middle East. The 3 month Graphic Design Internship was a process of learning while building and contributing. From creating visually aesthetic content for brand presence on social media to understanding the user pain and designing user centric websites for brands.

- **Design Department , EDOPIA MUN –**

Mar 2026 - June 2026

Managing and contributing to the design department for EDOPIA Model United Nations (MUN), creating visually engaging promotional and event-related content. Includes collaborating with cross-functional teams and assisting in content ideation, campaign execution, and digital communication strategies to strengthen online presence and delegate participation.

Projects

- **Nexus-03 (AlgoLog) – Web-Based Coding Tracker and Productivity Tool**

- Media Contributor - Contributed to UI/UX design by helping increase platform usage by creating interactive visuals and intuitive navigation layouts.
- Collaborated using GitHub version control with a cross-functional team of developers and designers.

- **Portfolio Website**

- Designed and developed a responsive personal portfolio using HTML, CSS, and JavaScript, featuring smooth animations, an academic timeline, and project showcases, deployed live via GitHub Pages.
